LIQUID VITAMIN E SUPPLEMENT FOR SHEEP

ADVANCED FEEDS

13 MELIADOR WAY, MIDVALE WA 6056

PO BOX 1996 MIDLAND WA 6936

TEL: (08) 9250 5344

FAX: (08) 9250 5355

FOR ANIMAL TREATMENT ONLY

INDICATIONS:

Vitamin E is a fat soluble vitamin naturally found in young green fodder. Levels are low and variable in hays, dry standing feed and grains. Body stores are sufficient for approximately 2 to 3 months when no green feed is available. Beyond this time supplementation may be required to maintain animal performance.

DOSE:

For adult sheep:
Administer 5ml every 6 weeks.
For lambs with moderate growth:
3.3ml every 6 weeks.
For hand fed fast growing lambs:
3.3ml every 4 weeks while in feedlot.

DIRECTIONS:

Administer orally via drench gun.
